Meeting Agenda

Date: 2014-05-06

Facilitator: Pontus Eriksson

Participants: Hampus Dahlin, Björn Hedström, Pontus Eriksson, Malin Thelin

1. Objectives (10 min)
   - Explain new plan and assign tasks for it.
   - Minor planning for coming week.

2. Discussion items (40 min)
   - Re-planning everything:
   - Instead of coupling everything like a wormnest, instead focus will be on a hierarchy-system with "black-box"-focus.
   - MainFrame will have a HeadControl, which will control the various elements through other controllers. This will lead to looser couplings and a better understanding of the whole program and code.

3. Outcomes and assignments (10 min)
   - Malin: In charge of HeadControl. Get everything working and tell other members what you need.
   - Pontus: General coding and fixing from old to new plan.
   - Björn: Get the GUI working, focusing on startmenu.
   - Hampus: Get whole Enviroment working.

4. Wrap up
